

Carr-Locke injection needle

listening...and delivering solutions®

Trusted performance...

World-renowned for its reliability and consistency, the **Carr-Locke injection needle** is designed to operate in the most tortuous conditions.

- **Stainless steel, Teflon coated, spring sheath** to virtually eliminate sheath kinking, while offering exceptional functionality and needle performance during challenging procedures
- **Ultra smooth distal metal hub** aids in tamponade and is gentle on friable tissue, helping to prevent sheath perforations
- **Luer-lock, spring-loaded handle** automatically retracts the needle, reducing the risk of inadvertent needle sticks or scope damage

Consistently deploys in retroflexed position

product number	sheath diameter (mm)	length (cm)	needle projection (mm)	needle gauge	units/box
BX00711811	2.5	230	5	25	5
BX00711812	2.5	230	5	23	5
