

Roth Net® retrieval devices

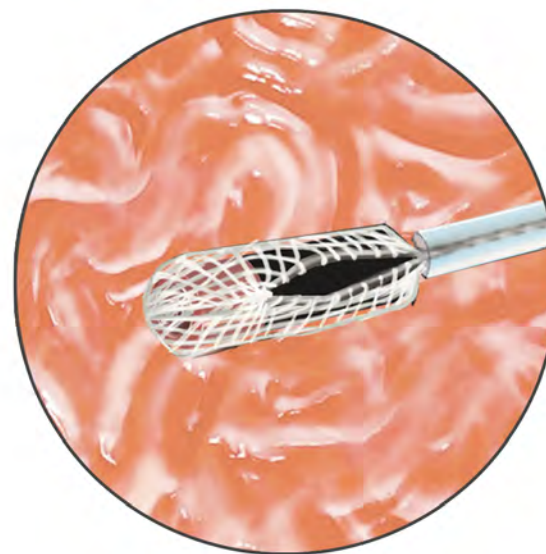

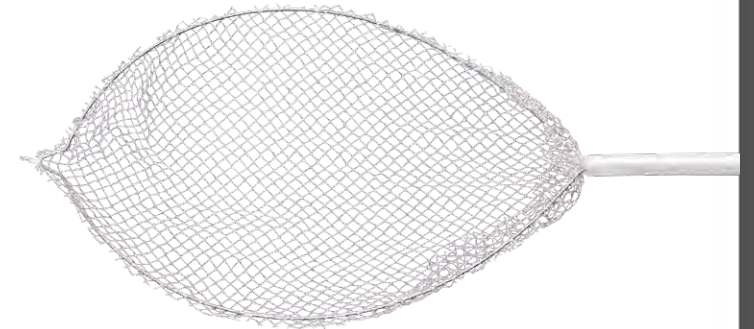

Our retrieval net portfolio offers a solution to both your common and unique retrieval challenges. From securing foreign bodies to capturing tissue specimens, the Roth Net® retriever is a device you can count on.

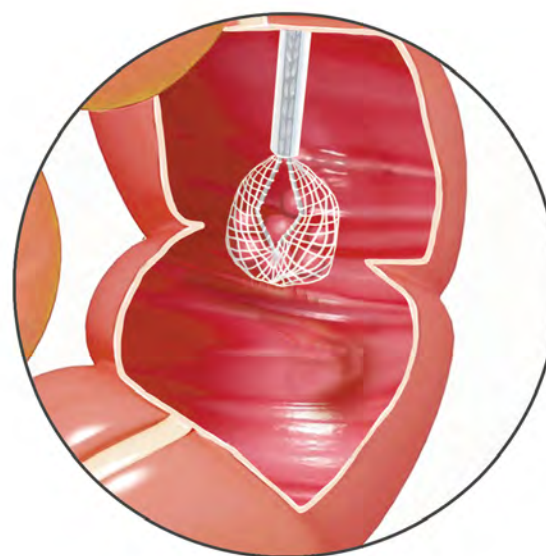

Roth Net® retriever - select:
Alternative weave design offers enhanced durability and strength for foreign body and food bolus retrieval.

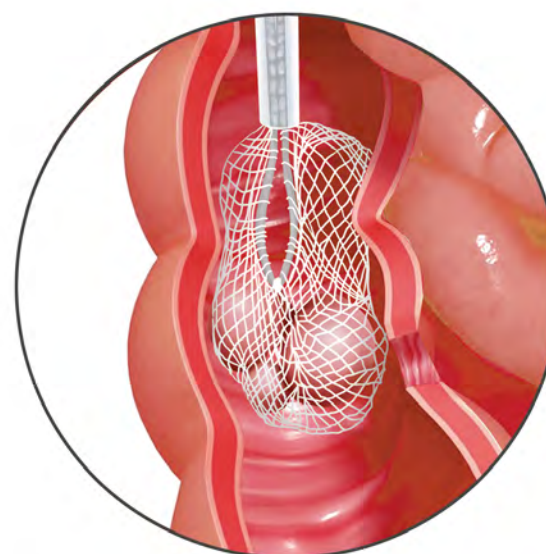

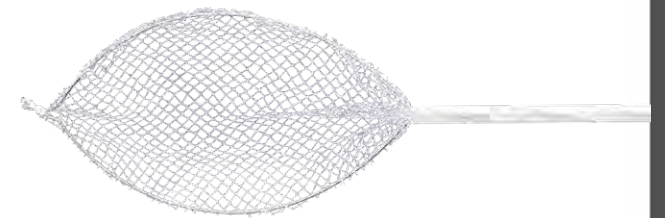

Roth Net® retriever - maxi:
Specifically designed for the retrieval of larger foreign bodies, including batteries.

Roth Net® Platinum® retriever:
Large octagonal shaped net opens fully, allowing for retrieval of hard to grasp foreign bodies, including coins and food impactions.

Roth Net® retriever - standard:
Quickly captures polyps and safely keeps tissue for histopathological review.

Roth Net® retriever - mini polyp:
Smaller net design offers enhanced maneuverability during retrieval within the small confines of the colon.
